Projects

ObserverModel | *AI Runtime Observability Platform* | GitHub 2026

- Built a behavioral intelligence platform that parses execution logs from AI coding agents (Claude Code, OpenHands, Codex) and detects anomalies like retry loops, repeated reads, context explosion, and secret access
- Combined deterministic rule-based detectors with Gemini-powered root-cause analysis, gated behind human-approval workflows before surfacing recommendations
- Implemented real token-cost attribution and historical execution dashboards for business-readable audit reports
- Deployed cloud-natively using FastAPI, BigQuery, Cloud Storage, and Cloud Run on Google Cloud

Team Lead | *Multilingual RAG Chatbot* — SIH 2025 Grand Finalist | GitHub Dec 2025

- Led a 6-member team to build a multilingual student-support chatbot for Smart India Hackathon 2025 Grand Finale
- Architected FastAPI backend workflows integrated with Neo4j GraphRAG pipelines for structured multilingual knowledge retrieval
- Designed retrieval and ingestion pipelines to improve response relevance across multiple languages

Role-Based Registration & Admin System | GitHub 2026

- Engineered a role-based backend supporting separate Founder and Audience workflows through unified REST APIs and schema-level role management
- Built admin-side APIs for participant filtering, search, deletion, and structured export workflows
- Implemented abuse-prevention safeguards: duplicate detection, request validation, sanitization, and IP-based rate limiting

Experience

Startly Innovations Pvt. Ltd. Apr 2026 – May 2026

Backend Intern *Remote*

- Built backend APIs using Node.js, Express.js, and MongoDB for a role-based registration platform supporting Founder and Audience workflows
- Designed admin APIs for participant filtering, search, deletion, and structured data export
- Implemented IP-based rate limiting, validation, sanitization, and duplicate registration prevention for public-facing APIs

Polytropic Services Pvt. Ltd. Jun 2025

Data Science Intern *Patna, India*

- Built Python-based data processing workflows using Pandas and SQL for structured ingestion and analysis of operational datasets, automating reports to cut down repetitive manual work

Technical Skills

Languages: Python, JavaScript, C++, SQL
Backend & Frameworks: FastAPI, Node.js, Express.js, Next.js, REST APIs
Databases: PostgreSQL, MongoDB, MySQL, Neo4j
AI / Cloud: Gemini API, LangChain, BigQuery, Cloud Storage, Cloud Run, RAG Pipelines, Hugging Face
Backend Concepts: Authentication, JWT, Rate Limiting, API Design, Input Validation
Tools: Git/GitHub, Docker, Linux, Postman, LaTeX

Education

R.R.S.D.C.E., Begusarai (Bihar Engineering University) 2023 – 2027

B.Tech, Computer Science and Engineering (Data Science) *Patna, India*

Achievements

Smart India Hackathon 2025 Grand Finalist — Team Lead, Multilingual RAG Chatbot
Google GenAI Academy APAC — Submission, ObserverModel
Competitive Programmer (Codeforces Pupil) — Max rating 1210
Yuvakriti State-Level Participant — Emotion Detection using Computer Vision
